

STILLEN

Press Release - 5/22/08 For Immediate Release

STILLEN Nissan / Infiniti Truck and SUV B-Pipes 2004-2008 Titan, Armada and QX56

In 2007 the 5.6 liter VK56 engine from Nissan got a slight make over. Along with the introduction of a variable valve timing cam system and new computer came a different setup for measuring the air/fuel ratio. In previous model years ('04-'06) Nissan monitored the a/f ratio using the front O2 sensors. In 2007 that configuration was changed to begin monitoring the a/f ratio from the rear O2 sensors after the secondary catalytic converters. This meant that an O2 emulator fix was no longer going to be effective and needed to be revised.

To keep the '07-'08 engine management system operating properly without the SES light illuminating with the headers installed, we have developed a set of replacement B-pipes. These B-pipes bolt in the factory location for the secondary catalytic converters. They are a direct bolt in and require no cutting or welding. One of the great things about these B-pipes is that with no further modifications we achieve gains of 7 RWHP, making this an effective upgrade for the 04-06 models as well.

Note: This part is designed for racing only. Use of this part on the street or highway is a violation of federal law in the United States. We sell this part on the condition that it be used in a legal manner.

More applications are available. For more information, please contact us at 800-576-2144.

STILLEN is an aftermarket performance parts manufacturer, retailer and wholesaler located in Orange County, CA. All R&D and design is completed onsite at their headquarters in Costa Mesa, CA under the direction of legendary IMSA Champion and multiple record holder, Steve Millen. With more than 20 years of experience in the industry, STILLEN can be counted on to deliver the highest quality parts at competitive pricing.
