Press Release - 7/28/08 For Immediate Release

AP Racing Big Brake Kits

2001-2007 Mitsubishi Lancer Evolution VII-IX

Front Part# [AP6800](#) and [AP6800R](#)

Rear Part# [AP6850](#) and [AP6850R](#)

AP Racing's 6-Piston (Front) and 4-Piston (Rear) calipers, matched with Brake Pro's two-piece 14"x1.25" (355mm x 32mm Front) and 13"x1" (330mm x 25.4mm Rear) rotors make these AP Racing street brake systems the ultimate four corner brake upgrade for the Mitsubishi Evolution. Packing a massive increase in stopping power, these complete kits provide confidence around town, in the dirt or conquering track days. As with all AP Racing kits, they are designed to perform with the factory OE master cylinder and are fully compatible with the factory ABS system. The rear kit also retains the factory parking brake setup. At the heart of this kit are our world famous AP Racing aluminum calipers and cross-drilled and slotted two-piece rotors. This setup virtually eliminates the fade found in the stock brakes. All of our big brake kits are delivered complete with caliper mounting brackets, DOT-compliant stainless steel brake lines, Mintex Xtreme Motorsport brake pads and all the necessary high-grade installation hardware.

Mintex Xtreme Motorsport pads do not compromise wear and noise for superior stopping capability. These pads perform between from 0-1300° F with less noise than most "high performance" pads. They also work cold, unlike other compromised pads which may leave you shaken up on the first stops of the day.

Now you can possess the same advanced brake technology preferred in NASCAR, Formula 1, World Rally Car (WRC) and more at an affordable price.

These kits are also available in a slotted only rotor configuration - add "S" to the part number.

Available in two colors: Red calipers with Black script or Black calipers with Yellow script.

Other applications available. For more information, please contact Brake-Pros at 800-711-4123.

Brake Pros, a division of Steve Millen Sportparts, Inc., has been bringing championship winning brake technology to the street since 1990. All design, development and testing are done at their Costa Mesa, CA headquarters under the direction of legendary IMSA Champion and multiple record holder, Steve Millen.
