Press Release - 9/2/08 For Immediate Release

AP Racing Front Big Brake Kit '00-'07 Honda S2000 Part# [AP7800](#) and [AP7800R](#)

AP Racing's 4-Piston calipers, matched with Brake Pro's two-piece 13"x1.10" (330mm x 28mm) rotors make this AP Racing street brake system the ultimate front brake upgrade for the Honda S2000. When combined with our matching cross-drilled and slotted rotors in the rear, this 4 corner upgrade packs a massive increase in stopping power. These complete kits provide confidence around town, through the canyons or at track days. As with all AP Racing kits, they are designed to perform with the factory OE master cylinder and are fully compatible with the factory ABS system. At the heart of this kit are our world famous AP Racing aluminum calipers and cross-drilled and slotted two-piece rotors. This setup virtually eliminates the fade found in the stock brakes. All of our big brake kits are delivered complete with caliper mounting brackets, DOT-compliant stainless steel brake lines, Mintex Xtreme Motorsport brake pads and all the necessary high-grade installation hardware.

The Mintex Xtreme Pads supplied with this kit do not compromise wear and noise for superior

stopping capability. These pads are good from 0-1300° F and do not squeal like most "high performance" pads. They also work cold, unlike other compromised pads which may leave you shaken up on the first stops of the day.

Now you can possess the same advanced brake technology preferred in NASCAR, Formula 1, World Rally Car (WRC) and Champ Car circuits at an affordable price.

This front kit is also available in a slotted only rotor configuration for heavy track use - add "S" to the part number.

Available in two colors: Red calipers with black script or Black calipers with yellow script.

Other applications available. For more information, please contact Brake-Pros at 800-711-4123.

Brake Pros, a division of Steve Millen Sportparts, Inc., has been bringing championship winning brake technology to the street since 1990. All design, development and testing are done at their Costa Mesa, CA headquarters under the direction of legendary IMSA Champion and multiple record holder, Steve Millen.
