

# BRAKE PROS / AP RACING BIG BRAKE SYSTEM INFO SHEET

Part# [AP4150R](#) (Red Caliper / Black Script) or Part# [AP4150](#) (Black Caliper / Yellow Script)

## Applications for AP4150R / AP4150 Rear Big Brake Kits:

- 2005-2007 Ford Mustang
- 2 *Front Kits* also available:
  - 6 Piston Front - Part# [AP4100R](#) or Part# [AP4100](#)
  - 4 Piston Front - Part# [AP4400R](#) or Part# [AP4400](#)

## Notes:

- Download the [Brake Fitment Profile](#) to confirm wheel clearance!
- Compatible with OE ABS, traction control and stability systems and factory master cylinder

## Calipers:

### **AP Racing 4 Piston Caliper (CP5147)**

- Lightweight, pressure cast aluminum alloy 2-piece body for better pedal feel than typical monoblock calipers
- Fixed radial mount for minimal caliper flex
- Hard anodized then finished with a tough 2-part paint system
- Differential piston bores minimize pad taper and maximize braking efficiency
- Secondary dust seals for everyday use
- Anti-Rattle clip to eliminate pad knock

## Rotors:

### **Brake Pros Two-Piece Rotors (330mm x 25.5mm)**

- Two-piece rotor design
- Directionally curved vanes for maximum cooling
- Cross-drilled and slotted for aggressive pad bite and better face cooling
- Retains OE parking brake function

## Brake Pads: **Mintex Xtreme Motorsport Compound**

- Xtremely high friction for race pad stopping power
- Excellent grip -- From cold to over 1300°F (700°C)
- Linear & predictable under all conditions

## Brake Lines and Hardware:

- Stainless steel outer braid with PTFE liner (DOT compliant)
- High performance hardware included

## Brackets:

- Aerospace-Grade aluminum alloy caliper mounting brackets for maximum strength and stiffness
- Anodized for durability
