

# BRAKE PROS / AP RACING BIG BRAKE SYSTEM INFO SHEET

Part# [AP6350R](#) (Red Caliper / Black Script)

Part# [AP6350](#) (Black Caliper / Yellow Script)

## Applications for AP6350R / AP6350 Rear Big Brake Kits:

- 2008 Subaru Impreza
- **Retains factory parking brake function**
- Matching 2008 Impreza Front Kit available under [AP3100](#) or [AP3100R](#)

## Notes:

- **Download the [Brake Fitment Profile](#) to confirm wheel clearance!**
- Compatible with OE ABS, traction control and stability systems and factory master cylinder

## Calipers:

### **AP Racing 4 Piston Caliper (CP5200)**

- Lightweight, pressure cast aluminum alloy 2-piece body for better pedal feel than typical monoblock calipers
- Fixed radial mount for minimal caliper flex
- Hard anodized then finished with a tough 2-part paint system
- Differential piston bores minimize pad taper and maximize braking efficiency
- Secondary dust seals for everyday use
- Anti-rattle clip to eliminate pad knock

## Rotors:

### **AP Racing 13" x 1.10" (330mm x 28mm)**

- Two-piece rotor design
- Directionally curved vanes for maximum cooling
- Cross-drilled and slotted for aggressive pad bite and better face cooling
- Slotted only rotors optional

## Brake Pads: **Mintex Xtreme Motorsport Compound**

- Xtremely high friction for race pad stopping power
- Excellent grip -- from cold to over 1300°F (700°C)
- Linear & predictable under all conditions

## Brackets:

- Aluminum alloy caliper mounting brackets for optimal strength and stiffness
- Anodized for durability

## Brake Lines and Hardware:

- Stainless steel outer braid with PTFE inner liner (DOT compliant)
- High performance hardware included
